

Airl is one of the most important radio stations there is out there now a days. Airl is uplifting, inspirational, and always keeps my head up high all the time as the music, dj's and the different parts of the station keep me on track and praising God. My community is greatly affected by Airl because when my friends and I want to listen to the radio, Airl is who we turn to and if they were gone, we would be lacking an essential part of our day. The part that keeps us going and working towards serving the king. The secular music of todays world only brings evil thoughts and desires whereas the positive alternative helps to keep us on the positive, yet narrow, path. Airl has changed me and inspired many others in my community and losing this station would be losing a part of ourselves.
